

Save electricity,
save money and
help the environment.
All in one move.

Reducing your business' electricity consumption means lower electricity bills while improving your bottom line. We can show you how you can use less electricity, with no cost or hassle, with the Power Savings Blitz program.

A brighter future for Ontario

The Ontario Power Authority is committed to ensuring that the province has a reliable and cost effective electricity system. The Power Savings Blitz program helps meet this goal. Our offer will benefit your business and it will also benefit Ontario. That's why we're happy to offer this program to you at no cost*.

UP TO \$1,000 IN ENERGY-EFFICIENT UPGRADES

FOR YOUR BUSINESS

The Power Savings Blitz program provides small businesses with up to \$1,000 in free* energy-efficient lighting and equipment upgrades – all with the aim of helping businesses like yours save money on your electricity bill. When you conserve energy you're doing more than just helping your business' bottom line - you are also contributing to a cleaner environment for your customers and the community.

The program is being offered to small businesses that have an electricity demand less than 50kW, in the office or retail sub-sectors.

* Subject to the terms and conditions of the program.

What Power Savings Blitz offers:

- Funding up to \$1,000 for retrofits (average total value of upgrades is \$840).
- Helps reduce electricity consumption and provides electricity savings up to \$400 per year.
- Free assessment.
- Turn-key lighting retrofits and water heating enhancements for small businesses; covers material and labour.

Eligibility Requirements:

- Program is entirely voluntary; business must be located in the local electricity utility service area.
- Small businesses in the office or retail sub-sectors including beauty salons, professional offices and other small retailers (but excludes food-related businesses who have unique requirements that may be addressed by future programs).
- Annual electricity demand of approximately 50kW or less and individually metered. (Note: most small businesses are able to meet these two criteria. If you're unsure please contact us).
- There are other conservation programs that may meet your business' needs, please contact us for more information.

Did you know...

There are many opportunities to save electricity in your business – and that simple changes can lead to extended benefits? For example, the T12 fluorescent tube lighting often used in stores and businesses is much less efficient than newer lighting technology. By converting these old light fixtures to ones with electronic ballasts and T8 tube lighting, they will consume about one-third less electricity.

How it works...

Step 1: WE assess your business

An advisor will conduct an assessment of your business and provide a list of recommended energy upgrades to help your business become more energy-efficient. **Please see the reverse for contact information and to book an assessment.**

Step 2: WE identify your options

After the assessment is completed, you can decide if you want to have a retrofit done. Funding of up to \$1,000 is provided for the retrofit (including cost of material and labour), with an opportunity for the customer to pay costs over the \$1,000 limit. The minimum amount for a free retrofit is \$300.

Step 3: WE install and upgrade

A licensed electrical contractor will install your free upgrades with your approval and at your convenience.
